Insulating mat

U840

Application

This mat is used to protect the fitter working area from contact voltage, during electrical work, without load in HV context and under load in LV one. Several models are available from class 0 to class 4.

Description

- This mat is made of rubber with both non-skid areas.
  - This mat offers a high dielectric strength.
  - It may be used for temperatures from -40°C to +70°C.
  - This mat is used directly laid on the ground.
  - Insulating mat is not a substitute to obligatory PPE but an element of secondary protection
- It meets the criteria of **IEC 61111** standard.

Insulating ladder

U841

Application

This insulating ladder protects the fitter from current voltage during electrical installation works.

Description

- This ladder is in fibreglass. It is entirely made of composite material and does not comprise metallic part to realise mechanical bonding (screw, bolt...).
- This ladder is light and easily transportable.
- It offers a high resistance to atmospheric and chemical agents.
- It is available in several lengths.
- The ladder bottom is equipped with a stabilizer for models with a length superior to 3 meters.

This ladder meets the criteria of **EN 131** standard.
